

[Lead2pass New Lead2pass 300-360 New Questions Free Download (61-70)]

2017 November Cisco Official New Released 300-360 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed! I have already passed Cisco 300-360 certification exam today! Scored 989/1000 in Australia. SO MANY new added exam questions which made me headache?.. Anyway, I finally passed 300-360 exam with the help of Lead2pass! Following questions and answers are all new published by Cisco Official Exam Center: <https://www.lead2pass.com/300-360.html>

QUESTION 61 When reviewing a design for a voice over wireless deployment, what per-call bandwidth cost should be factored in when determining maximum calls per cell using SIP and G.711u as the codec? A. 64 bytes B. 8 bytes C. 80 bytes D. 10 bytes Answer: C

QUESTION 62 Which two factors influence the density of APs in a data-only WLAN environment? (Choose two.) A. the number of clients that will roam through the facility B. the type of controller chosen C. the defined coverage area and customer needs D. the number of APs dedicated to voice services E. channel reuse and WLAN bandwidth Answer: CE

QUESTION 63 Which type of information should be included in an installation report? A. A complete characterization of the external WLAN environment. B. The exact number of users the WLAN will support. C. Soft copies of configuration for switches, routers, controllers, and location appliances. D. A detailed description of the WLAN environment during the post-installation testing, for example, number of people present, furniture, no furniture, and sources of interference present. Answer: C

QUESTION 64 Which two pieces of physical infrastructure information should be included in the installation report presented to the customer? (Choose two.) A. A list of router and switch models, serial numbers and locations. B. The total square footage of the customer's facility. C. An analysis of the facility exterior wall and roof construction materials. D. The cable scan results for the entire customer facility. E. An installation inventory of all controllers and APs in the WLAN coverage area. Answer: DE

QUESTION 65 Which two factors influence the density of APs in a data-only WLAN environment? (Choose two.) A. Channel reuse and WLAN bandwidth B. The type of controller chosen C. The defined coverage area and customer needs D. The number of clients that will roam through the facility E. The number of APs dedicated to voice services. Answer: AC

QUESTION 66 When designing and deploying an outdoor mesh network, what is the appropriate RF cell overlap? A. 10 percent B. 15 percent C. 20 percent D. 25 percent E. Application dependent Answer: E

QUESTION 67 What is the result if a client radio is incapable of supporting all the 5 GHz channels you have deployed in the controller or APs? A. You may only be able to deploy 20 MHz-wide channels. B. This may result in the client having to roam more frequently to find a channel it supports. C. This may result in coverage holes in the network. D. You may only be able to deploy 40 MHz-wide channels. Answer: C

QUESTION 68 If you are calibrating for 2.4 GHz and the site will not be using 802.11 and 802.11b data rates, what should be done to ensure an accurate calibration? A. Make sure that the access points have the unused rates disabled. B. Make sure that you are using an 802.11b client when calibrating. C. Make certain that there are no legacy clients when performing the calibration because they will disrupt the process. D. Make sure to use a client that supports both 802.11b/g and 802.11a. Answer: A

QUESTION 69 What two factors could cause a post-deployment audit to show a high retransmission rate for the WLAN? (Choose two.) A. CRC errors B. Rate shifting C. CCX compatible clients D. High SNR values E. High RSSI values Answer: AB

QUESTION 70 When designing a WLAN, AP placement is important. How would you rank the density of APs needed to support location services versus data and voice services? A. Voice and data services both require a higher density of APs than location services. B. Data services have a lower density of APs compared to location services, but more than voice. C. Voice services have the highest density of APs over location and data services. D. Data services have the lowest density of APs compared to location services, which has the highest density. Answer: D

Lead2pass 300-360 PDF dumps is perfect! Totally! Thanks so much! 300-360 new questions on Google Drive: <https://drive.google.com/open?id=0B3Syig5i8gpDU1VGRGVieEdJWGM> 2017 Cisco 300-360 exam dumps (All 94 Q&As) from Lead2pass: <https://www.lead2pass.com/300-360.html> [100% Exam Pass Guaranteed]
